EDUCATION

Master of Computer Application (MCA)

Nitte Meenakshi Institute of Technology

CGPA: 8.99

Bangalore – Nov 2024

Bachelor of Science (BSc)

S R N M N College of Applied Science

Percentage: 82%

Shivamogga – Sep 2022

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, Java, C.

Frontend: React.js, React Native, Expo, Tailwind CSS.

Backend: Node.js, Express.js, FastAPI.

Database: MongoDB, Firebase.

Version Control & DevOps: Jira, Git, Github.

Machine Learning & Artificial Intelligence:

TensorFlow, Keras, scikit-learn, OpenCV, NLTK, Hugging Face Transformers, Natural language processing.

Data Science & Analytics: Pandas, NumPy, Matplotlib, Seaborn

INTERNSHIP AND EXPERIENCE

TechMust Software Pvt. Ltd

Software Developer Executive Apr 2025 – Present

Software Developer Apr 2024 – Apr 2025

- Designed and developed scalable web and mobile applications using **ReactJS, NodeJS, Firebase, and React Native Expo, NoSQL DB**, improving system efficiency by 30% by using **MVC Architecture**.
- Led the development of two internal projects, including an **AI-powered machine learning application**, enhancing data processing speed by 40%.
- Integrated **Firebase Authentication and Firestore Database** for seamless backend operations.
- Facilitated **agile development** via **Jira**, focusing on **sprint planning, prioritization, and iterations**.
- Collaborated effectively with cross-functional teams, fostering a positive team environment and demonstrating leadership by mentoring and guiding 2 fellow developers to drive project success.

Exposys Data Labs

Web Developer Nov 2023 – Dec 2023

- Developed a real-time video chat application using Django, **WebRTC**, and **JavaScript**, ensuring zero latency communication.
- Built and integrated REST APIs to enable seamless data flow between frontend and backend, reducing data retrieval time by 35% and improving overall system responsiveness.

PROJECTS

Accident Detection Using Machine Learning

- Executed a real-time accident detection system for car dashboards using Python, GPS, and GSM modules with a **CNN algorithm** achieving **96% accuracy**, which autonomously alerts nearby ambulance and police stations, enhancing rapid emergency response by **50%**.
[Github/AccidentDetection](#)

Brain Stroke Detection Using Machine Learning

- Deployed a brain stroke detection model using CNN with a **97% classification accuracy** on CT scan images from a Kaggle dataset, enhancing robustness through data augmentation and transfer learning, which reduced overfitting by **30%** using techniques like dropout and cross-validation
[Github/BrainStrokeDetection](#)

My Portfolio (MERN)

- Crafted a responsive portfolio website using **ReactJS, MongoDB, ExpressJS, and NodeJS**, featuring interactive user interfaces and efficient data storage to demonstrate modern web development proficiency.
<https://kishor-g-s.netlify.app/>

Weather App (MERN)

- Launched a weather application using ReactJS and OpenWeatherAPI, featuring an intuitive interface that provides a **24-hour detailed forecast** and comprehensive **3-day forecasts** in Celsius and Fahrenheit, showcasing expertise in frontend development and API integration.
<https://sky-sync.netlify.app/>

Real-Time Video Summarizer

- Devised a system that records live video, transcribes audio, and generates AI-driven summaries. Integrated a **React.js** frontend and **FastAPI** backend with video recording, speech-to-text transcription, and text summarization.

CERTIFICATIONS

- Google Cloud Computing – NPTEL
- Python Programming, Complete ReactJS -Udemy
- Machine Learning with Python
- Introduction to Data Science – Cisco
- Mastering Generative AI and Chatgpt
